_____ AM 9:00 am to 12:00 or _____ PM 12:30 pm to 3:30 pm or _____ 8:00 am to 4:30 pm

WEEK ONE. “Science: Space & Anatomy”.

The Montessori program will be in effect, which will help the children to work on concrete Montessori material to understand the abstract concepts of anatomy and space. For example we will be working with matching planets; we will build a skeleton with q-tips etc. To infinity and beyond...We will be talking to kids about science but more specifically Space & Anatomy. They will be learning about what space is and what it involves. As most children display an enthusiastic interest in Astronomy, we will enrich their interest with knowledge and displays, which will provide the building blocks for more advance intellectual development. They will also participate in learning about the basics of the human body. We will share information regarding human anatomy which includes functions of different body parts for example vital organs like the heart, brain, kidneys and lungs. We will also perform science experiments.

WEEK TWO. “Underwater”. A whole new World...We will be taking the children underwater to a world that they may have never seen before. Incorporating The Montessori Program with salty water work, sink and float, pouring and sponging. They will be learning about sea life under the water and about animals that live there. We will enhance their interest with knowledge and photographs, which will provide a bigger curiosity of the underwater world. We will learn about plant life, animal life, sand and much more. The majority of the Earth's surface is covered by oceans. These oceans contain almost all of the water on Earth. This means that the oceans are of paramount importance when it comes to our survival. A lot of the oxygen that you breathe is produced by all oceans. We will make our own ocean and also crafts of amazing creatures living underwater. We will open the doors to enhance their imagination.

WEEK THREE. “Camping”. The best memories are made camping. We will be turning our classroom into a “Camp site” during this week. Children will experience the camping life of tenting; make believe camp fires, making s’mores, singing songs going on hikes/scavenger hunts and much more. They will experience what it is like to be away from home and not having the luxury of television, tablets, phones, and no outside distractions. They will also learn about what animals they can see in the mountains, what activities are done outdoors, and how different life is compared to being in the city. When camping, people usually prepare food to eat that is easy to make. If they were hunting or fishing, they may cook the animal or fish they caught over a campfire.

WEEK FOUR. “Olympics”. Let the Games Begin. We will be teaching the kids about the Olympics. They will be learning about what the logo stands for, about the continents that are involved in the Olympics and they will have an idea of what the Olympics consists of, both winter and summer. For instance athletics training, dietary, games, sportsmanship, healthy competition, wins and losses. They will learn what it takes to be a champion and how much hard work goes into the Olympics. They will learn that Calgary hosted the Olympics in 1988. They will gain a sense of how the Olympics work and what it takes be an athlete, and how sportsmanship is the key.

WEEK FIVE. “Let’s be chefs – Indian Style”. Bon appetite. Our little chefs will be cooking up a storm every day. There may be a visit to save on Foods, to pick up some delicious ingredients to cook. The children will be able to get their hands dirty and learn to be pros in the kitchen. At the end of the week, they will get a recipe book to take home. They will also learn about nutrition, good eating habits, how to set up a table and about Indian cuisine. Your signature below will permit our teachers to take your child for a little walk to the grocery store. Please be advised of any allergy or restrictions. Sensorial material in Montessori is designed to develop and refine children senses including sense of taste by allowing children to cook from scratch. This will help them to develop concentration and they will learn the whole cycle from grain to bread. Activities that are included will satisfy their gustatory sense.

WEEK SIX. “Outdoor & Sports”. The best way to get your child outside is to go with them. We will be taking the children outside for hikes and sports. They will build their motor skills by engaging in outdoor activities. They will be visiting parks, collecting rocks, looking for bugs and flowers, and enjoying nature. Children will practice some fun gardening activities, have nature walks and having a picnic. They will experience the outdoor life which is a fundamental part of Montessori. It is very important for kids to go outside and experience the outdoors, as they not only learn about the nature, but they will also learn how to take care of other surroundings and be thankful for what nature has to offer us.

AUTHORIZED PERSON(S) PERMITTED TO PICK UP YOUR CHILD FROM ZEBRA CROSSING MONTESSORI PRESCHOOL & KINDERGARTEN:
